OHIO SMART GRID MODERNIZATION PROJECT From David Conley at First Energy: “The Ohio Smart Grid Modernization project allows us to integrate modern technology within our distribution system that helps reduce the impact of an outage, such as a car pole accident or a tree falling into wires. The system, once fully implemented, will locate, then isolate the outage to a smaller group of customers. This means an outage that might have taken out thousands of customers before would only effect potentially 100s of customers depending on the magnitude of the incident. This also means that customers that do see an outage will experience quicker repair and restoration. The antennas that our being installed throughout our territory allow the necessary remote control to run the equipment on our distribution line over a secure proprietary network. This would be like having a mesh wireless network in your home to have secure internet access everywhere in your house.”

EAST EDGERTON ROAD BRIDGE DECK REPLACEMENT The East Edgerton Bridge is expected to fully close starting June 2, 2022 and remain closed through September 29, 2022. Great Lakes Construction was awarded the East Edgerton Road Bridge Deck Replacement Project. This bridge is being replaced along with the bridge over Brecksville Road. This project is being administered by The Ohio Turnpike.
